This product is not subject to the Construction Products Regulation.

Installation

1. Screw or dowel the base profile (=plug mounting). In case of floor heating, fix the profile by using a 2-components glue.
2. Adapt the hard floor covering and pay attention to the expansion joint.
3. Put the top profile carefully on the base profile, bring it first into the right position, then screw the top profile on the base profile. Pay attention that the screws are fixed in the screw channel of the base profile (see graphic on first page). After first fixing tap by well controlled hammer blows and screw again by hand the screws again.
Attention: Never use the hammer directly but use a hardwood with felt.
4. Finished!

For further information of the installation use the brochure PPS® - Champion / PPS® - Champion XXL from our website or additional installation information as well as our installation video for this or similar PPS System on web or our YouTube channel.

In case of questions contact the export department or our application engineer.
